

The name of the game

DUO BAT 110+

- Double layer batten system
- For even and uneven sub-floors
- A flexible system with a minimum construction height of 110 mm + packing
- Hides insulation, ventilation, cabling and pipes

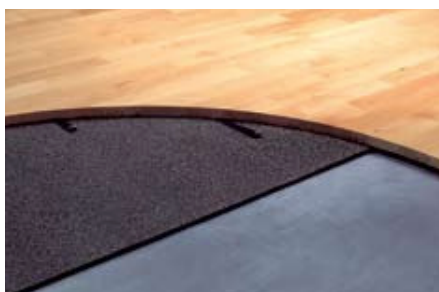

UNO BAT 62+

- Single layer batten system
- For even and uneven sub-floors
- A flexible system with a minimum construction height of 62 mm + packing
- A choice of two different batten centres
- Hides insulation, ventilation, cabling and pipes

UNO BAT 50

- Single layer fully sprung batten system
- For even sub-floors
- Fixed low construction height of 50 mm
- A choice of two different batten centres
- Can be installed over existing flooring

CLIP SYSTEM

- A floating sports floor which is installed with Junckers clips over a shock absorbing foam underlay
- For even sub-floors
- Performance depends on sub-floor and foam underlay resilience
- A construction height of 27 or 32 mm, depending on sub-floor
- Can be installed over existing flooring

PORTABLE SYSTEM

- A floating sports floor made of panels which are installed with special fittings over a shock absorbing foam underlay
- Performance depends on sub-floor and foam underlay resilience
- A construction height of 27 or 32 mm, depending on sub-floor
- The optimum solution for individual or specific line markings
- Quick and easy installation and dismantling
